

Optional Autosun Dimmer Wiring Diagram

When wiring a dimmer to the Autosun lights:

- Use a minimum of 20 gauge wire.
- Do not exceed a maximum run of 80'.

Specifications:

Input Voltage (Max.):10V DC

Input Voltage (Min.):0.5V DC

Output Control Current (Max.): 40mA

Working Temperature: -10°C - 40°C ambient operating at full load

Working humidity: 20% - 90% RH non-condensing
